IN THE CLAIMS

Please add the following new claims as follows:

61.   A method comprising the steps of:

inputting invoice data associated with an import/export transaction at a first terminal
coupled to a computer network, wherein the invoice data includes a product identifier identifying
a product to be transported in the import/export transaction;

transferring the invoice data from the first terminal to a server hosting a database of
product identifiers and tariff classification information particular to each of the product
identifiers;

matching the product identifier identifying the product to the product identifiers in the
database; and

outputting a data record in response to the matching step, wherein the data record
includes tariff classification information associated with the product identifier identifying the
product.

importing a product into a country using the data record.

62.   A method for importing products into a country, comprising the steps of:

creating an invoice representing a purchase of the products by a customer resident within
the country, wherein the invoice lists the products by product number;

uploading invoice data over a network to a server from a workstation coupled to the
server over the network, wherein the invoice data is an electronic version of the invoice;

creating a database of customer products and tariff classification information, wherein the
database is accessible by the server, wherein the database comprises product numbers for
products particularly associated with the customer, wherein the product numbers are each
assigned a harmonized tariff number particular to the country;
